EDUCATION

- **A. P. Shah Institute of Technology** 2022 - 2026
 - *Bachelor of Engineering - Computer Engineering; CGPA: 8.42 (up to Sem VII)*
- **K. J. Somaiya College of Science and Commerce** 2022
 - *H.S.C. (XII); Percentage: 77.50%*

SKILLS SUMMARY

- **Languages:** Python, Java, SQL
- **Frameworks & Libraries:** React.js, Flask, Django, Streamlit, NumPy, Pandas, Matplotlib, Scikit-learn
- **Databases:** MySQL, MongoDB
- **AI/ML :** OpenAI API, Google Gemini API, Hugging Face Transformers, LangChain
- **Cloud platform & Tools:** AWS(Cloud Foundations - EC2, RDS, S3)
- **Developer Tools:** Jupyter Notebook, VScode, Postman, Power BI, Microsoft Excel

PROJECTS

- **Financial Intelligence & Insurance Decision Platform**
 - Architected a full-stack financial intelligence platform using **React**, **Flask**, and **MongoDB**, integrating **Prophet** and **ARIMA** models to forecast macroeconomic indicators for dynamic insurance risk assessment.
 - Deployed **Gemini LLM** for automated policy summarization and personalized insurance recommendations, enabling context-aware decision support at scale.
 - Designed a modular analytics pipeline supporting real-time user profiling and gap analysis, improving underwriting accuracy through data-driven economic signals.
- **AI-Based Knowledge Extraction & Document Summarization System**
 - Built a multi-modal AI pipeline processing PDFs and videos using **Whisper** (speech-to-text) and **BART/LSA via Hugging Face Transformers** for hierarchical summarization of PDFs and video content.
 - Automated generation of structured flashcards and Q&A pairs using **Gemini**, supporting active recall learning through intelligent content chunking and NLP-driven extraction.
 - Engineered a scalable content processing backend with **Django** and **Supabase**, handling concurrent multi-format ingestion with efficient storage and retrieval workflows.
- **StockPulse – Time-Series Forecasting & Market Analysis System**
 - Developed an **LSTM**-based deep learning model for stock price forecasting, trained on historical market data ingested via live **Financial APIs** for real-time predictive analysis.
 - Engineered technical indicators including moving averages and RSI as feature inputs, significantly improving model signal quality and trend prediction accuracy.
 - Built an interactive **Streamlit** dashboard visualizing actual vs. predicted price trends, enabling intuitive interpretation of forecasting outputs for end users.
- **Real-Time Food Redistribution & Donation Matching Platform**
 - Developed a full-stack donation coordination platform using **Node.js** and **MongoDB**, connecting restaurants and NGOs through a real-time surplus food matching and tracking system.
 - Delivered a responsive frontend in **HTML/CSS/JavaScript** with live donation status tracking, enabling seamless multi-party coordination across donors and recipients.

CERTIFICATIONS

- **AWS Academy Graduate** – Cloud Foundations
- **AWS** – Data Engineering
- **Google AI/ML** – AICTE
- **Celonis** – Process Mining Fundamentals
- **IBM SkillsBuild** – Data Analysis with Python

LEADERSHIP & EXTRA-CURRICULAR

- **Ladies Representative, The Student Council - APSIT (2024 - 2025)**
Led initiatives representing female students by organizing soft-skills sessions and mentorship programs. Collaborated with faculty and peers to improve participation and enhance overall student engagement.
- **Joint President, Computer Students Association (CSA) - APSIT (2023 - 2024)** Directed CSA activities by organizing technical workshops and events, fostering hands-on learning in emerging technologies, managing end to end planning from requiremen gathering to execution and increasing student participation.
